

Structure Formation in Surfactant Solutions

A personal view of 35 years of research in surfactant science

Heinz Hoffmann

**University of Bayreuth, BZKG/BayColl, Gottlieb-Keim-Str. 60, 95448
Bayreuth, Germany**

Introduction

Content

- 1. Kinetics of micelle formation**
- 2. Viscoelastic surfactant solution**
- 3. Solubilisation of hydrocarbon**
- 4. Shear induced structures**
- 5. Iridescent colours**
- 6. L_{α} -phases and MLV**
- 7. L_3 -phases**
- 8. Swelling of L_{α} -phases by glycerole**
- 9. Novel microemulsions with a HIPE structure**
- 10. Emulsions from sticky droplets**
- 11. A hydrogel from PC**
- 12. Tubuli**
